Analysis of October 31, storage holdings and occupancy.....	1
Net change in storage holdings during October.....	3
Apple holdings, by States.....	4
Pear holdings, by States.....	4
Fresh fruits, vegetables, and nuts in storage.....	5
Dairy and poultry products in storage.....	6
Dairy and poultry products in storage, by States.....	7
Frozen fruits and vegetables in storage.....	8
Meats and meat products in storage.....	9
Cold Storage holdings, by geographic regions.....	10
Commodities stored in public general cold storage warehouses.....	12
Certain commodities in storage owned by the Government.....	12
Fishery products in storage.....	13
Space and occupancy in public general warehouses in selected cities.....	14
Space and occupancy in public general refrigerated warehouses.....	15
United States refrigerated net piling space.....	16

[Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. All October 31, data are preliminary.]

U. S. DEPARTMENT OF AGRICULTURE
STATISTICAL REPORTING SERVICE
Agricultural Estimates Division
Washington, D. C.
Cost 1(11-64)

PERCENTAGE OCCUPANCY OF PUBLIC COLD-STORAGE WAREHOUSES

U. S. DEPARTMENT OF AGRICULTURE

NEG. SRS 24-64 (11) STATISTICAL REPORTING SERVICE.

Commodity Summary

Warehouse stocks of refrigerated foods totaled 8.2 billion pounds on November 1, according to the Crop Reporting Board, 3 percent less than on November 1, 1963 but 11 percent larger than the 1958-62 average for the date. The 4.3-billion pounds in cooler rooms were slightly less than the record high and 3.9 billion in freezer rooms were the third largest on record for the date. Stocks of fresh apples totaled 55 million bushels, 8 percent less than a year earlier but 10 percent larger than average. For the holidays ahead, supplies of fresh grapes, onions, dried and evaporated fruits, nutmeats (except peanuts) and nuts in shell are larger than last year. Holdings of all frozen poultry totaled 490 million pounds, about equal to the stocks of a year earlier, but supplies of turkeys were down 4 percent. The 345-million pounds compared with 361 million pounds of turkeys held on November 1, 1963. Frozen fruit stocks were 27 percent greater than at this time last year and 12 percent larger than average. Seasonal gains in stocks of apples, grapes, and peaches were more than offset by net withdrawals of the other frozen fruit items and total fruit supplies were lowered by 8 million pounds to 614 million. Frozen vegetables stored on November 1 were 83 million pounds greater than the previous month and the 1,297 million pounds compared with 1,359 million on November 1, 1963. Supplies of orange concentrate were lowered during October and totaled 19 million gallons on November 1. For the date, stocks were 18 percent less than last year and 25 percent lower than average. November 1 warehouse stocks of beef and pork, were larger than both last year and average. Holdings of beef totaled 262 million pounds, 11 percent greater than at this time last year and 65 percent greater than average. Frozen pork supplies increased seasonally as the result of net gains in all pork cuts except jowls and butts. Total holdings of frozen pork were 188 million pounds compared with 177 million a year earlier and 114 million, the average. Supplies of ham amounted to 50 million pounds, almost equal to the record November 1 supplies last year. Holdings of butter were reduced 39 million pounds to 142 million following heavy withdrawals of Government-owned supplies. American cheese in storage was down 16 million pounds to 303 million. Shell-egg stocks moved up to 161 thousand cases while frozen egg stocks declined to 84 million pounds. Supplies of both were below average for the date but larger than last year this time.

Cooler and Freezer Stock Changes

Stocks of most cooler-held items increased during October and on November 1 totaled 4.3 billion pounds. This was a net gain of 1.8 billion over the previous month's cooler weight. Seasonal advances were reported in stocks of fresh fruits (except pears), fresh vegetables, nutmeats, canned milk, eggs, pork, and canned meats. Partially offsetting were declines in stocks of dried and evaporated fruits, nuts in shell, cheese, and beef. Total freezer weight moved up with gains in stocks of poultry, vegetables, beef, pork and other meats. The net increase of 134 million pounds raised November 1 holdings to 3.9 billion pounds. During October, stocks of cream, butter, eggs, fruits, and juices were lowered.

Storage Occupancy in Public Warehouses

Occupancy of both cooler and freezer space in public refrigerated warehouses increased 1 percentage point during October. On November 1 cooler occupancy was 58 percent of capacity, 1 point less than a year earlier and 3 points under average for the date. Freezer occupancy was 70 percent, 4 points below November 1, 1963 and 8 points under average.

Poultry and Poultry Products

Frozen poultry supplies on November 1 were 490 million pounds, slightly larger than a year earlier and 49 million above average, but 60 million pounds less than the record stocks on November 1, 1961. Holdings of frozen poultry increased 124 million pounds during October, compared with a gain of 126 million pounds during October 1963 and the average October gain of 122 million. Turkey stocks were 345 million pounds -- an increase of 112 million pounds during October. These holdings were 4 percent below a year earlier, but 17 percent above average. Turkey stocks were 10 percent less than the November 1 record of 382 million in 1961. Supplies of frozen eggs were 84 million pounds -- a decline of 14 million pounds from October 1. On November 1 last year stocks were 80 million pounds, while the average for the date is 102 million. Stocks of shell eggs were 161 thousand cases, a gain of 6 thousand cases during October. A year earlier there were 137 thousand cases on hand, with the average for November 1 at 265 thousand.

Dairy and Dairy Products

Stocks of butter in storage on November 1 were 142 million pounds, 23 percent below average for the month and half as much as a year earlier. Holdings declined 39 million pounds during October, compared with a 44-million pound drop during October 1963 and the average decline of 24 million. Government-owned butter in storage on November 1 was 100 million pounds, leaving 42 million in commercial channels. There were 48 million pounds in commercial storage a year earlier. Holdings of American cheese on November 1 were 303 million pounds, 10 percent less than a year earlier and 13 percent below average for the date. Stocks declined 16 million pounds during October, compared with a 27-million pound reduction during October last year. The average decline during the month is 20 million pounds.

Meat and Meat Products

Supplies of meat and meat products increased 51 million pounds during October to 583 million on November 1. A year earlier stocks gained 17 million pounds which is the average increase for the month. Holdings were 8 percent more than on November 1, 1963 and 49 percent above average. Beef holdings were 262 million pounds, a gain of 5 million during the month which is the average increase for October. A-year-earlier stocks increased 17 million pounds. Stocks of all pork were 7 percent above November 1 a year ago and 47 percent more than average. Frozen pork holdings were 188 million pounds, an increase of 35 million pounds during October while cooler pork totaled 35 million pounds, an increase of 4 million. Supplies of frozen pork bellies on November 1 were 33 million pounds, compared with 22 million on October 1 and 23 million at this time last year.

Fruits, Vegetables, and Juices

November 1 stocks of fresh apples were 55 million bushels of which 12 million were in controlled atmosphere rooms. Total supplies were down 4 million bushels from a year earlier but 5 million above average for the date. Frozen fruit holdings declined seasonally following reductions in stocks of eight major fruit packs. Gains were reported only for frozen apples, grapes, peaches and miscellaneous frozen fruits and the resultant net loss of 8 million pounds lowered warehouse stocks to 614 million pounds. On November 1 last year, holdings were 483 million pounds. October net receipts of frozen vegetables raised supplies in all areas except in the East North Central, East South Central and West South Central. The net gain of 83 million pounds brought total November 1 supplies of frozen vegetables up to 1,297 million pounds, 5 percent under the level of a year earlier but 18 percent more than average. Orange concentrate supplies were down to 19 million gallons on November 1 after an October decline of 7 million gallons.

1/ Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, Armed Services, and other Government agencies. In addition to stocks reported above, Armed Services hold some stocks in space owned and operated by them on which figures are not available.

2/ Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month.

3/ Does not include butter oil, ghee, and canned butter.
